Inspector Treiber,

The Flight Standards Service, General Aviation Operations Section, AFS-830 has reviewed information provided to us, including an Application for Certificate of Waiver or Authorization received March 3, 2023, and supporting documentation for the Borrego Valley Airport Aerobatic Practice Area in Borrego Springs, CA located in San Diego County. Given the intensity of use, location, type aircraft proposed, and base altitude, our review concludes that the proposal would produce environmental effects that are not significant. This is consistent with FAA's determination that the Federal action to approve a Certificate of Waiver for an Aerobatic Practice Area of infrequent use is categorically excluded from further environmental analysis per paragraph 5-6.6b of FAA Order 1050.1F. Furthermore, the proposed Federal action has no extraordinary circumstances as contained in paragraph 5-2 of the same order. A copy of this statement should be included with the proponent's file.

Note: There is an endangered species listed for the Borrego Valley Airport Aerobatic Practice Area. The species is the Least Bell's Vireo.

Sincerely,

David Menzimer
